Most pitchers with split ratings have their charts based on seasons where their statistics as a starter and reliever are combined, like Carl Hubbell. I do not have a source that shows the breakdown of those statistics. Independent statistics are available for pitchers who had 4 solid years as a starter as well as a relief pitcher, as if they had two different careers. I assigned "split" statistics to those pitchers to reflect their dual careers, John Smoltz for example.

Babe Ruth is carded separately for his pitching career on the CD. He is listed with the Boston Red Sox

You will find two files on the CD containing players who are not listed on my rosters, some not necessarily star quality. I have made the cards available to you, referenced as "Unlisted".
