Fastscore Baseball is a quick play game designed to generate the score of a baseball game with a few rolls of the dice. This can be used as a supplement to other baseball games, allowing you to quickly play games in a replay scenario, or could be used as a standalone game.

Fastscore Baseball is played using three pages of charts and two differently colored 6-sided dice. Each team has three ratings- an offensive, defensive and bullpen rating. These ratings are used to determine the number of runs the team scores in the game. Higher OFF ratings represent better offenses, while lower DEF ratings represent better defenses. Higher BPN ratings represent stronger relief pitching.

This game is unlike any other quick play baseball game because it uniquely takes into account the offensive and defensive talents of each team. In addition, the strength of the bullpen plays a major role in close games. With Fastscore baseball, teams will perform more similarly to their real stats than can be achieved with any other quick play game system. Optional rules allow each team's starting pitcher to influence the chance of victory, thus you could use actual pitching rotations and the as played schedule for maximal realism.

Rules for play:

- 1) Determine each team's scoring rating.
 - a) To calculate the scoring rating take the team's OFF rating and add it to their opponent's DEF rating.
- 2) Determine the number of runs scored.
 - a) The visiting team rolls first- roll both dice and read them sequentially- for example, if using a red and white die, and the roll is "3" on the red and "5" on the white die, read the result as "35"
 - b) Refer to the team rating on the Scoring Chart.
 - c) Look up the dice roll in the row corresponding to the team rating (found in the left most column). The number at the top of the column is the number of runs scored in the game.
- 3) Repeat step 2 for the home team.
- 4) Extra Innings: If the score is tied:
 - a) Each team rolls one die
 - b) Add each team's BPN rating to the die roll
 - c) The team with the higher total is the winner of the game- subtract 1 run from the losing team's score. If the two totals are equal, the home team wins- add 1 run to their score.

OPTIONAL RULES:

- 1) HOME FIELD ADVANTAGE: To simulate home field advantage, add one point to the home team's rating and subtract one point from the visiting team's rating.
- 2) STARTING PITCHER: For added realism, you can use the defensive rating associated with the starting pitcher instead of the team defensive rating. The OFF rating is added to the opponent's starting pitcher's DEF rating as described above to determine the team's scoring rating.
